This has been and still is a great program that has benefitted many families here in FLorida. It has given families a viable school choice. As a parent with two children involved in the program , my family's experience has been exemplary and I can understand why the Orange Parents are upset. This is something we should have access to and right now...not next year. The districts will realize that this is a program that parents love once exposed to it and will want to see continue. I want to invite all readers to visit the website of the FLorida Coalition of Virtual School Families, and sign up to be members. To all the Orange County parents who want to use this program and are standing up and fighting, I say, keep up the good fight, join us and together we'll be heard. Let's fight for our program in every district in the state!! <http://www.flvirtualfamilies.org/home/>
