FCAT help

Florida Virtual School's online FCAT prep courses are designed to prepare students for the eighth and 10th grade FCAT tests. In partnership with the Florida Learning Alliance, these courses assist students in developing critical thinking, problem solving and test-taking skills essential for success on the FCAT and in other academic and vocational endeavors. In addition, it is a super opportunity for parents and students to learn about the online learning environment. This course is not offered during the school day. However, this is an enrichment program above and beyond the classroom. Anyone with Internet access can log on to the site. In addition to preparing for the FCAT, students can also take high school courses via the site. For additional information, log on at <http://www.flvs.net> or call your child's guidance counselor.
