

DEPARTMENT:	Information Technology	REPORTS TO:	Senior Manager, Data Services & Compliance
JOB CLASS:	Software Developer	PAY GRADE:	38
EXEMPT STATUS:	Exempt	DATE:	10/16/2014

Our Mission is to deliver a high quality, technology-based education that provides the skills and knowledge students need for success.

POSITION GENERAL SUMMARY:

The ETL (Extract, Transform, Load) Developer designs, develops and supports ETL process and tools. The ETL Developer is responsible for data loading and manipulation to ensure that the data sources are efficiently and effectively loaded into the data warehouse. The ETL Developer is required to provide weekly status reports to their supervisor in the Information Technology (IT) department.

ESSENTIAL POSITION FUNCTIONS:

- Develop and manage effective working relationships with other departments, groups and personnel with whom work must be coordinated or interfaced
- Establish and enforce data warehousing standards to meet requirements and business needs
- Evaluate existing subject areas stored in the data warehouse and determines where data should be stored
- May assist in one or more components of the overall architecture of the data warehouse system
- Create SSIS ETL solutions with Microsoft SQL Server environment
- Utilizes SQL development to produce effective database development
- Develops solutions to minimize implementation risk and time and/or improve system reliability and performance
- Review ETL programs for compliance with best practices, standards, enterprise architecture and documentation requirements, ETL process, programs and scripts
- Conduct root cause analysis and resolve performance and production problems and data issues
- Validate the data in the database and test the developed routines
- Provide ongoing maintenance and support of assigned ETL applications
- Assist in several components of the overall ETL process and data warehouse system
- Document tasks for end-user, technical, and managerial review to ensure high quality customer service
- Perform quality assurance testing of data integration and report development and monitor data load operations to ensure accuracy
- Provide a minimum of weekly status report updates for current projects
- Meet professional obligations through efficient work habits such as, meeting deadlines, honoring schedules, coordinating resources and meetings in an effective and timely manner, and demonstrate respect for others
- All work responsibilities are subject to having performance goals and/or targets established

(These essential functions are not to be construed as a complete statement of all duties performed. Employees will be required to perform other job related duties as required.)

MINIMUM REQUIREMENTS:

Education/Licensure/Certification:

- Bachelor's Degree in Computer Science or Information Systems; or equivalent combination of education and relevant experience

Experience:

- Five years' ETL development, preferably for large, complex data sets
- Experience with MS BI Stack, SSAS, SSIS, SSRS, development required
- Solid experience in analyzing query performance issues and modifying data structures or application code to remedy performance problems
- Experience with Kimball Dimensional Modeling, Bus Matrix and DW Lifecycle
- Experience with HR and/or Finance data
- Experience working with relational databases
- Experience working with programming concepts
- Experience working with company database and statistical software
- Extensive experience with data warehouse technologies and implementations such as ETL processes, dimensional modeling, and reporting tools

Knowledge, abilities and skills:

- Ability to work with users in a requirements analysis role
- Knowledge of logical and physical data modeling concepts (relational and dimensional)
- Highly skilled in SQL development and capable of writing complex and efficient query and stored procedures. Experience in SQL Server 2012 Enterprise Edition preferred
- Advanced knowledge of integration technologies, such as Web Services and messaging systems
- Excellent understanding of relational and dimensional data models
- Knowledge of data administration, repository management, and data warehousing
- Ability to work independently and as part of a team
- Strong interpersonal and customer service skills
- Strong verbal and written communication skills
- Strong conceptual, analytical, and judgment abilities
- Ability to work with/for multiple employees and meet deadlines
